

# **Multifunctional CardTerminals MCT**

**for  
Health Care  
and  
other Application Areas**

**Specification Version 0.9**

**August 1995**

**Editors  
"Joint German Panel in Health Care"  
GMD - German National Research Center for Information Technology**

# Contents

Part 1:**MCT - Basic concept**

Part 2:**CT-ICC-Interface**

Multifunctional CardTerminal Interface for contact orientated ICCs with synchronous and asynchronous transmission

Part 3:**CT-API 1.1**

Application independent **CardTerminal Application Programming Interface** for ICC applications

Part 4:**CT-BCS**

Application independent **CardTerminal Basic Command Set** for ICC applications

Part 5:**IC cards** with synchronous transmission

Part 1: **ATR and data sections**

Part 6:**IC cards** with synchronous transmission

Part 2: **Transmission protocols**

Part 7: **IC cards** with synchronous transmission

Part 3: **Usage of inter-industry commands**

Part 8:**Host-CT-Interface**

for MCTs with V.24/V.28 connection

This specification is a translation of the German specification

”Multifunktionale KartenTerminals MKT für das Gesundheitswesen und andere Anwendungsgebiete”

This specification was managed by

Working Group "Multifunctional CardTerminals (MCT)" of the  
"Joint German Panel in Health Care"  
(Chairman of the MCT-WG: Bruno Struif, GMD)
